EXPERIENCE

Cloudveto technologies | Machine learning intern

Hyderabad, India. | MAY-2024 - JULY-2024

During my internship at Cloudveto Technologies, I worked on the "Share Market Analysis Project," where I applied Machine Learning and Deep Learning techniques to analyze financial data. I gained proficiency in financial forecasting, time-series analysis, and using libraries like TensorFlow and scikit-learn.

SKILLS

Programming Languages: C, Java, Python, Machine learning, Flutter, MySQL, PL/SQL, Html, Css

Tools / Platforms: Git, Vs code

Databases: SQL

PROJECTS / OPEN-SOURCE

ELECTRIC BILL PREDICTION | [Link](#)

Machine learning

I worked on a project to see what affects household energy bills. I cleaned the data and used three types of regression models to predict energy costs: linear, ridge, and lasso. I checked how accurate these models were using different error metrics, showing my skills in data analysis and machine learning.

VEGETABLE CLASSIFICATION USING IMAGE DATASET | [Link](#)

Machine learning

I developed a machine learning project for classifying vegetables using image datasets. By applying different models and preprocessing techniques, I achieved high precision and recall through optimization and fine-tuning, contributing to agricultural automation and efficiency.

STOCK MARKET ANALYSIS | [Link](#)

Machine learning

This project aims to conduct a comprehensive analysis of the stock market, focusing on identifying trends, evaluating stock performance, and providing insights for potential investments. Additionally, it will predict the top 5 stocks from given data.
